

Ow optical cable

Overview

With full support for Thunderbolt 4/3 and USB4/3/2 devices, the Active Optical Cable provides up to 40Gb/s of stable bandwidth, up to 240W of power delivery, and up to 8K video resolution. But it's not just speed and power delivery that make this cable special. These cables are used mainly for digital audio connections between devices. A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light. The optical fiber elements are typically. Which is why we're excited to announce our new OWC Active Optical Cable, a high-speed cable designed to give you the ultimate flexibility in optimizing your workspace the way you want it. It enables data rates of up to 40 Gbps over routes that are many kilometers long, does not have a negative effect on adjacent cables, and at the same time is resistant to. worldwide quality standards. Prysmian never has a pre-determined answer to a challenge – instead.
