

Package Substation Integrated Distribution Box

Overview

The Compact Substation, also known as a prefabricated substation or package substation, is a fully enclosed power distribution solution that integrates high-voltage switchgear, distribution transformers, and low-voltage switchgear into a compact and modular unit. Packaged substations are tailored to individual customer requirements using products from the comprehensive range, providing a convenient, single source packaged substation with minimum time and cost. Boost operations with Schneider's Package Substations. CSS is used for energy transformation in secondary. Lucy Electric have accumulated a wealth of experience through close collaboration with Distribution Network Operators (DNOs) and large industrial customers in their respective fields of medium voltage (MV) secondary switchgear and automation solutions. Designed for urban power networks.
