

Parameters of the 10GSR Optical Module

Overview

FS SFP-10GSR-85 is a 10GBASE-SR SFP+ (850 nm) transceiver supporting up to 300 m on MMF with DOM. View specs, wiring, LINK-PP compatible alternatives and procurement guidance. The high performance uncooled 850nm Vcsel transmitter and high sensitivity PIN receiver provide superior performance for 10G Fibre Channel and Ethernet. The Cisco® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications. The module features Digital Optical Monitoring (DOM/ DDM). In this article, ETU-LINK will deeply analyze the differences between different 10G SFP+ dual-fiber optical modules from multiple dimensions such as technical parameters, transmission distance, optical fiber type, typical applications, etc. As enterprise networks, cloud data. LOS (Loss of Signal) is an open collector/drain output, which should be pulled up with a 4.
