

Relay Protection Tester Sverker

Overview

Megger's SVERKER 650 offers secondary relay testing and primary injection for electrical distribution substations, renewable power generation stations, and industrial applications. Primary and secondary injection in complete ranges from low to high amplitudes with high precision, delivering. This is the Megger SVERKER780, the upgraded version of the Megger SVERKER750 relay test set. Both kits are basically identical - they are powerful, multifunctional relay testers which can easily be ported from testing point to testing point. All values are presented on a single easy-to-read display. You can also. Set is the engineer's toolbox. The control panel features a logical layout, still SVERKER 650 users will find it comfortably familiar and will b ke relay testing more efficient.
