

ST Fiber Optic Patch Cord Classification

Overview

ST is an acronym for “Straight Tip”. This type of connector is metal and uses a bayonet style plug and socket. Essentially, this means the connector is twist and lock (but NOT actual screw on) like the common BNC connector seen used in A/V applications (often seen used on coaxial). Fiber optic patch cords, as one of the fundamental components of optical network cabling, are widely used in the construction of fiber optic links. ST. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of fiber patch cords and how to choose the right solution for your project – and how ZION can support you with stable quality, flexible customization. They comprise two tight buffer fibres housed within an individual outer jacket in OM1, OM2, OM3, OM4, OS1, OS2 multi-mode and single mode variants. Both ends are terminated with a high performance hybrid or single type connector comprising of a SC, ST, FC, LC, MTRJ, E2000 connector in simplex and.
