

Six-port SC type fiber optic distribution frame

Overview

The P-PSP-G19-1U-6-SC optical fiber distribution frame with a side shelf combines the features of two elements for installation of devices and fiber optic cabling termination in a RACK cabinet. 19" rack mountable ODF with 72-port capacity for high-density fiber management. Comes with 6 pre-installed 12F splice modules, allowing quick and organized fiber splicing. Easy installation and. 3C-LINK DIN Rail Fiber optic terminal box is available for the distribution and terminal connection for various kinds of optical fiber system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cores or pigtails are connected The DIN rail type termination. Efficient Organization and Protection: The SC Fiber Optic Panel features a wall-mountable design with dimensions of 255mm x 130mm x 40mm, allowing for both vertical and horizontal installation. It provides optimal protection and keeps fiber distribution organized, especially in space-constrained. FTTH Application: Ideal for FTTH installations, this frame simplifies fiber distribution for broadband networks. Estore: Distributon units Library: Some Theory (6), Connectors & Splicing (7), Measurements (2), Building. Fiber optic patch panel is an integrated unit for fiber management, SINET offer wall mounted fiber optic patch panel and rack mounted fiber optic patch panels, these equipment function is to fix and manage the fiber optic cables inside the box as well as provide protection.
