

South Asia Single-Phase Relay Protection Tester

Overview

Single phase relay tester is a relay test equipment with overload protection and signal, forming a powerful display unit, powered by 220V 50Hz. The output channel is reversible and can be either Voltage or Current. The design incorporates the latest in modern digital microprocessor. HZJB-D SINGLE PHASE RELAY TEST is a portable field testing equipment with excellent performance; Elegance and polished appearance with aluminum alloy chassis and PC panel, within the ARM chip control, LCD screen display voltage and current output stopwatch, it could output a full isolation way for. Verify protection relays with speed and accuracy using Megger's single-phase test sets. The PAM420 is specifically designed for measurements on electrical power systems.
