

Sub-distribution box

Overview

Colloquially speaking, the sub-distributors are often referred to as fuse boxes or power boxes. Their task is to distribute the electrical energy in a residential building using switching and safety elements. In Germany, distributors are generally standardized according to the DIN. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. This item has been tested to certify that it can dispatch safely in its original box or bag to avoid unnecessary packaging. Since 2015, we have reduced the weight of outbound packaging per shipment by 41% on average, that's over 2 million tons of packaging material. We work hard to protect your. Our portfolio covers the full spectrum of Power Distribution Units – from permanently installed wall-mounted units to a wide range of mobile solutions. Whether large energy and main Power Distribution Units, portable sub-distribution boxes, compact units or power outlet blocks – we offer the right. Our sub-distribution boards offer the right low voltage (LV) solution for large buildings by dividing the electrical power feed into subsidiary circuits.
