

Switch access IP restricted

Overview

For example, you can restrict access to SSH, HTTP, HTTPS, Telnet, or all of these services by IP address. Go ahead and click on Access Profiles. After initially configuring my new switch a few weeks backs, I wasn't happy knowing that anyone connected to my LAN or WLAN could get to the login page by just knowing the IP. There is a switch which is connected the cisco router and all the workstations on the LAN connect to that switch. The cisco router is the gateway with an IP of 192. There LAN IPs for the. Visit your product's support page, select the correct hardware version for your device, and check either the Datasheet or the firmware section for the latest improvements added to your product. Other very useful features are private vlans that can limit a port to another specific port etc (e. Restrict Access to Cisco Switch Based on IP Address MSNSwitch2 Internet Enabled IP Remote Power Switch with Reboot - Control via Smartphone App, Cloud.
