

XL-21 distribution box

Overview

The Fulleto XL-21 series is an indoor, floor-standing power distribution cabinet engineered for excellence. The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options for users to choose, it is an ideal alternative to the old XL-21 power cabinet. The switchgear meet the requirements of standard IEC60439 etc. It is primarily used for power. It serves as a power distribution and lighting solution for low-voltage distribution systems operating at 50Hz AC, with a rated voltage of 400V or 660V. The XL-21 power distribution cabinet is used in power plants and industrial and mining enterprises, serving as a power or lighting distribution unit in three-phase AC systems with voltages below 500V, including three-phase three-wire, three-phase four-wire, and three-phase five-wire configurations.
