

Zambian Drop Fiber Optic Cable 4 Cores

Overview

This Drop Fiber is constructed with Single Mode fiber (9/125 μm) and comes in core counts of 2, 4, 8, 12, 24, 48 strands. Single Mode fiber in this drop cable has the ability to operate at 1G/10G/40G/100G/400G speeds. With the cladding layer, they are 125 micron, and with the buffer layer they are 250 micron. To prevent excessive loss. Drop Fiber Cable is an out door rated fiber cable. Drop cable is ideally used in shorter distance connections (under 4km), primarily due to the construction of the cable. This fiber optic cable boasts a single-mode design with a core diameter of 9 micrometers and a cladding diameter of 125 micrometers, ensuring excellent data transmission. High-quality SC/APC singlemode I-V (ZN)H FTTH distribution cable (single-ended, with pull-in aid at the open end and bend-optimized) for universal indoor and outdoor use, including installation between buildings in ducts and inside buildings up to riser ducts. A fiber optic patch cord is constructed from a core with a high refractive index, surrounded by a coating with a low refractive index, that is strengthened by aramid yarns and surrounded by a protective jacket.
